

February 20, 2015

Weather Alert

Just a reminder, a weather advisory states temperatures will drop well below freezing tonight. Take appropriate action to prevent pipes and equipment freezing!

NJSIG Loss Control Manager

Frozen Pipes

How to Prevent Freezing & Thawing Pipes Safely

Even if you have not experience frozen pipes in the past, sudden cold snaps can occur and may cause pipes to freeze up or burst. This guide will help you identify systems that are potentially at risk, how to protect them and how to thaw them should they freeze.
